INSTRUCTIONS FOR FINDING THE HOLSTER THAT FITS YOUR PHONE

SIZE CONSTANT β : The size constant is a good approximation when the measurements are not exact.

β size constant: The width plus 2 times the depth: it provides a good estimate of fit if the width and depth are not an exact fit.

General considerations: If the width is off by more than .25 inches or the depth is off by more than .125 inches, it probably won't be a good fit.

EXAMPLE: If you have a phone with a cover that has a height of 5.8", a width of 2.9" and a depth of .6" the size constant is 4.1". Looking at the list of holsters above, the CO-286 provides the best fit. The CO-333 has a size constant that is close but too small. The CO-349 is also close but the individual measurements are too far off and it too may be too tight.

If you are in doubt as to which size holster provides your best fit, call us toll free at 877-506-0150 M-F 9AM - 5 PM Eastern. Be sure to have the measurements of your phone or your phone in its protective cover, if applicable.
