

RIPOFFS PHONE HOLSTERS SIZE CHART

IF YOU DON'T SEE YOUR PHONE LISTED HERE OR ARE NOT CERTAIN ABOUT THE FIT, READ THE INSTRUCTIONS BELOW ON FINDING THE RIGHT HOLSTER

Measure your phone in its protective cover, if applicable. To determine which holster has the right size pocket for your phone calculate the size constant (β = width + 2 times depth). Find a holster of approximately the correct height where the calculated β of your phone does not exceed the β for the holster. In other words, find a holster on chart that has the same or slightly larger β than your calculated β for your phone. Ideally, the width and the depth should not be off by more than 1/8th of an inch each. The height can be off by 2/10th of an inch either way and will still give you a good fit since there is a quarter inch of play in the hook and loop closure.
